

EMERALD NECKLACE RE-CONNECTOR, Boston, Ma.

Project completed at Johansson Design Collaborative Role: Project Landscape Architect

Project Information: This park, located along Olmstead's Emerald Necklace, serves as a bike & pedestrian connection, a neighborhood park, and as a visual barrier from the proposed bus facility. The designs include separated curving paths for bikes, skaters and pedestrians, naturalistic plantings, sports courts & fields, and play structures. Grading and level changes are utilized to create separation between different uses and the bus facility.
