

## TWO RESIDENCES, La Jolla, Ca.

---

Project Information (Upper Photos): This 1.5 acre residential site included design for parking court, gate, pool, spa and an area for fruit trees. The planting is informal and the landscape elements were sensitively located on the sloping site. Lower Photos: The small private garden of this residence is designed with low-maintenance, California natives and no lawn. The fountain's stones are coordinated to match the colors of the home.
